

# Social Network Updating From Your Skype Account

---

## Social Updating - Holy Cow ... You Can Skype Your Ping.fm Updates!

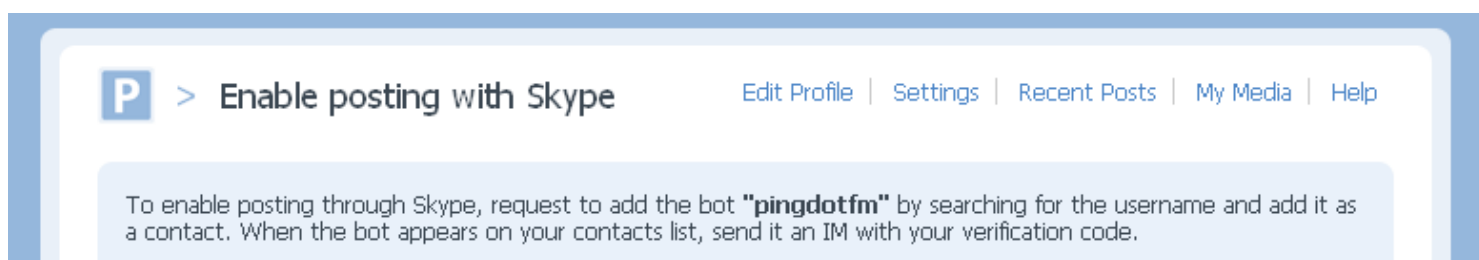

Yep you heard right ... Skype can update your social network profiles for you.

I had no clue. One of my new outsourcers showed me how :)

Schweet! (on so many levels - grin)

So here's how it works...

### Step 1 - Login to Your Ping.fm Account

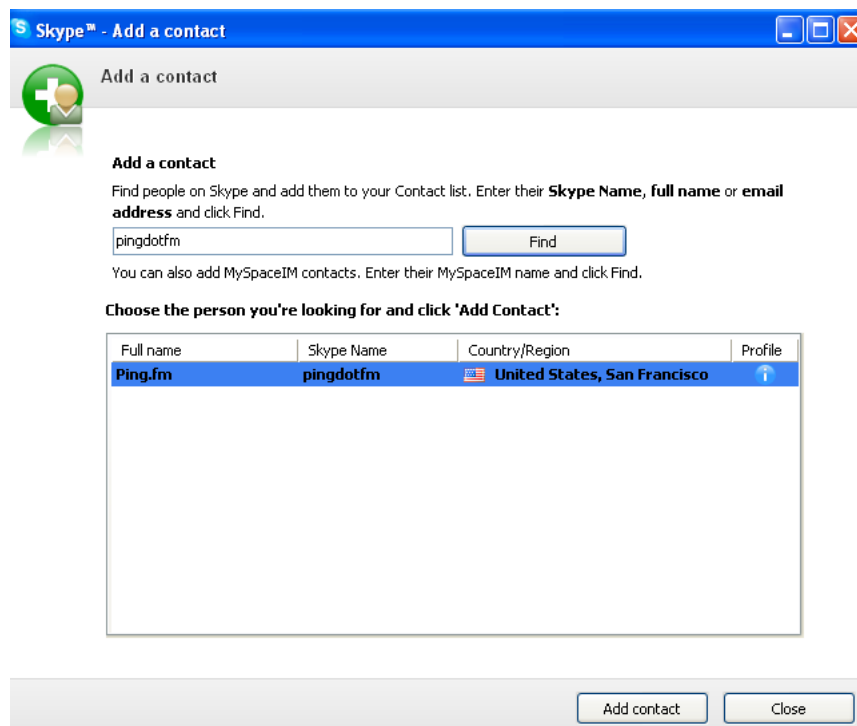

Login to your ping.fm account and go to this page: <http://ping.fm/im/skype/>

Just below the area that I cut the image off you will see your verification code.

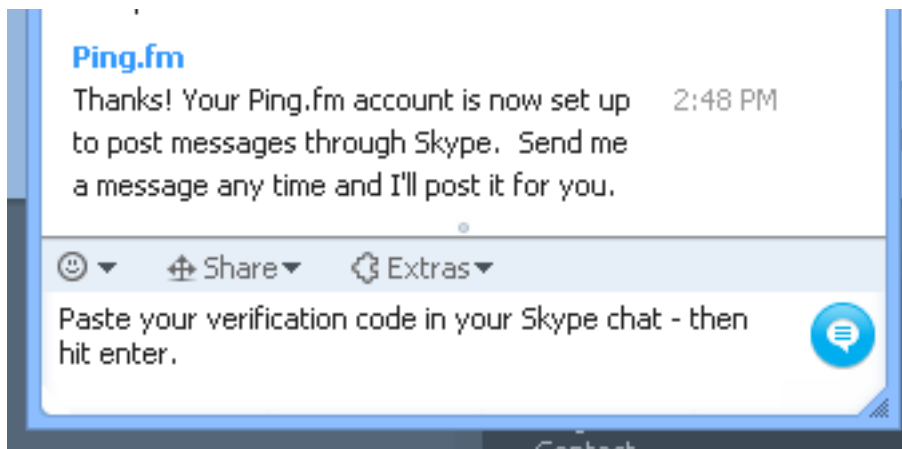

Copy that to your clipboard (Ctrl+C). And paste it into a text document or into your Google search field on your browser for safekeeping (a handy tip I learned from Frank Kern - grin)

## Step 2 - Open Skype to Add the Ping.fm Bot

Add a contact to your Skype Contact list as usual - search for **pingdotfm** then click -> add contact.

## Step 3 - Verify Your Account With Pingdotfm

To allow your Skype account to talk to your Ping.fm account - you have to verify your Skype account. It's easy.

Open a chat window with pingdotfm and paste the verification number that we grabbed in Step 1. Send the chat.

It may take a few seconds, but you will get a confirmation message like the one above.

#### **Step 4 - Update Ping.fm**

Now - anytime you want to update your ping.fm account - it's as simple as sending your new Skype contact "pingdotfm" a chat message.

How cool is that??

Very very in my little corner of the world :)

#### **Step 5 - PS. Quick Exit Poll :)**

Whatcha think about this lesson format?

It's something new I'm trying inside my [Biz Blog Help member area](#).

Short and sweet video will also be landing there :)

Appreciate you!

Andrea
